

MOTO REVOLUTION

2010 Yamaha YZ450F gives power to the people

1

- | Optional YZ Power Tuner plug-in unit takes you from mild to wild with the push of a button.
- | Lets owners adjust fuel injection volume and ignition timing maps to match engine performance characteristics to rider and track conditions.
- | Makes the most out of the track, the 2010 YZ450F... and you.

2

- | YZ450F's bold new design swaps traditional intake and exhaust positions, putting the lightweight airbox and throttle body out front.
- | Re-positioned fuel tank is underneath seat which centralises mass and aids handling.

3

- | Rear exhaust improves weight distribution and new plush centrally mounted shock sits where airbox was.
- | All-new aluminium Bilateral Beam frame provides a superb rigidity balance that complements the engine for unmatched lightweight handling.

4

- | New 4-titanium valve fuel injected motor provides awesome linear power.
- | Offset cylinder minimises losses resulting in quicker response.
- | Rearward slanting cylinder centralises mass for improved handling.
